Love's Paleocene Seabird *Australornis lovei*

ZEALANDIA'S TOP FOSSIL PALEOART DRAWING COMPETITION

Palaeontologists use fossils to work out what the skeletons and muscles of these ancient animals looked like. However they can't usually tell what their skin or feathers were like. Illustrations of extinct animals or restorations are known as paleo art and artists have to use their imaginations when colouring them. Were these animals camouflaged to hide? Were they bright to attract mates? Show us what you imagine. You could win a prize!

Age: _____

Email: _____

Telephone: _____

There are 10 animals to choose from. You can enter as many drawings as you like. Two prizes will be awarded, one in each of the following categories: 10 years and under, and 11 to 15 years. Email your entries to info@canterburymuseum.com or drop it in the box in the Museum foyer. Emailed files should be JPEGs and bigger than 1MB but smaller than 10MB and include your contact details (email address and telephone number).
